

Name: _____

Date: _____

Genetics

Across

- 3. allele that can be masked
- 9. having parents from 2 purebred strains
- 10. recognized as the father of modern genetics
- 12. RNA acting as a model to make proteins

- 14. tiny units that enable DNA to code traits
- 15. DNA copying process

Down

- 1. allele that expresses its trait over another allele
- 2. factors that control traits
- 4. the first step in DNA decoding

- 5. genetic material
- 6. the study of how characteristics are inherited
- 7. what DNA looks like
- 8. forms of each gene
- 11. what chromosomes are made of
- 13. refers to a gene that has changed its instructions
