

Geo Vocab Extra Work

Across

1. 2 lines that never touch
3. angles found outside parallel lines
5. 2 angles that are opposite each other on an intersection
13. a line that starts and stops at endpoints
15. to take turns or change sides
16. angles less than 90 degrees
17. a line that intersects 2 parallel lines

18. angles greater than 90 degrees

19. all 3 sides of the triangle are different lengths

20. same angle in a different location

Down

2. 2 or more angles that add up to 90 degrees
4. 2 lines that intersect at 90 degree angles
6. two rays that share a common endpoint
7. angles found inside parallel lines

8. 2 or more angles that add up to 180 degrees

9. two sides of a triangle are the same length

10. 2 angles that are next to each other

11. same shape, same size

12. all 3 sides of a triangle are the same length

14. a line that starts at an endpoint and extends in one direction
