

# Geography

## Across

- 3.** a large landform that rises above the surrounding land in an area, usually in the form of a peak. It is steeper than a hill.
- 6.** the planet we live on
- 7.** an overflow of a large amount of water from the river or sea onto what is normally dry land.
- 8.** natural movement of the air, that can be light or strong.
- 9.** when liquid water falls out of the sky in separate drops.
- 12.** the way that water moves between being gas to liquid water and then back to gas.

**15.** a large natural stream of water flowing in a channel to the sea or a lake

**16.** a violent weather with strong winds and usually rain, thunder, lightning, or snow.

**17.** the study of the physical features of the earth and the atmosphere

## Down

**1.** when electric comes out of the sky with high voltage between a cloud and the ground or within a cloud, along with a bright flash and thunder.

**2.** a loud rumbling or crashing noise heard after a lightning flash.

**4.** the gases that surround the earth.

**5.** a picture of an area of land or sea showing physical features, cities, roads, etc.

**10.** the natural home or environment of an animal, plant, or other organism.

**11.** the state of the atmosphere at a give place and time, such as heat, cloudiness, dryness, sunshine, wind, rain, etc.

**13.** a long period of very low rainfall, leading to a shortage of water.

**14.** water vapour in the sky frozen into ice crystals and falling in light white flakes
