# Geology

## Across

- 2. Large sections of the Earth's crust that slowly moves
- 4. A scientist that studies earthquakes
- 10. Measure of an earthquake
- 12. An opening at a mountain top
- 14. The earths layer between the crust and the core
- 15. Trembling or shaking of the ground
- 16. A crack in the earths crust

- 17. The area in the Pacific Ocean where many of the worlds earthquakes and volcanoes occur

- 19. Scientists who studies volcanoes

- 20. Molten rock under the Earth's surface

## Down

- 1. Rock that forms when magma cools and hardens
- 3. How did the landmass separate millions of years ago
- 5. Seven main land masses of earth

- 6. One plate dives beneath another

- 7. The outer layer of the earth

- 8. Molten rock that comes to the earths surface from a volcano

- 9. The hot centre of the Earth

- 11. Huge killer waves

- 13. A tremor that occurs after the main earthquake

- 18. The studies of the structure of earth and how it works
