

# Geometric Academic Language

## Across

- 7. interior angles that lie on the same side of the transversal.
- 8. nonadjacent interior angles that lie on opposite sides of the transversal
- 9. a theorem that can be proved easily using another theorem
- 10. two sides of a triangle are congruent, then the angles opposite those sides are congruent

## Down

- 1. planes that do not intersect
- 2. lie on the same side of the transversal  $t$ ; in corresponding positions
- 3. have congruent corresponding parts-their matching sides and angles
- 4. noncoplanar; they are not parallel and do not intersect
- 5. a line that intersects two or more coplanar lines at distinct points
- 6. coplanar lines; lines that do not intersect
