

Geometry

Across

2. 2 angles that are equal and are formed by intersecting lines
 4. A triangle with 2 congruent sides
 7. Two figures with corresponding sides that are proportional
 8. An angle that measures more than 90 but less than 180

9. A reduced or enlarged drawing of an actual object
 11. A three sided figure whose angles add up to 180
 12. 2 angles with a sum of 180

Down

1. Lines that intersect to form 4 right angles

3. 2 angles with a sum of 90
 5. Two figures that are exactly the same size and shape
 6. A triangle with no congruent sides
 10. Formed when 2 rays connect at a common endpoint
