

Geometry

Across

3. Two lines that cross at one point

8. A line that intersects two other lines

10. An angle that is greater than 90 degrees but less than 180 degrees

11. A shape with all four sides equal lengths and all angles are 90 degrees

12. Lines that do not touch and go on forever

14. A triangle with three unequal sides

15. The study of shapes

Down

1. A 90 degree angle

2. A shape with eight sides

4. A triangle with equal side lengths and equal angle measures

5. A line with two end points

6. A shape with five sides

7. A triangle with two equal side lengths

9. A line with one end point and the other end goes on forever

13. An angle with less than 90 degrees but more than 0 degrees
