

Geometry

Across

3. Points on the same plane
 4. Two lines are lines if they do not intersect and are not coplanar.
 6. Reasoning based on observation:
 7. is a segment from a vertex to the midpoint of the opposite side.
 10. has no dimension. It is represented by a dot.
 11. Points on the same line

12. Reasoning based on facts:

13. a rule that is accepted without proof is called.....

Down

1. A segment connects the midpoints of the sides of triangle
 2. has two dimensions. It is represented by a shape that looks like a floor or a wall, but it extends without end.

5. a ray that divides an angle into two angles that are congruent.

8. is the set of points the figures (lines and planes) have in common

9. has one dimension. It is represented by a line with two arrowheads, but it extends without end.
