

Geometry

Across

2. a solid figure with more than one face

8. Figure with equal faces.

10. Equilateral and equiangular polygon

11. Distance from the center is the same and is known as a 3D figure.

12. a solid figure with more than one face

Down

1. four straight sides and four right angles, especially one with unequal sides and faces

3. Half of a sphere

4. Simple closed figure with 3 or more sides.

5. Three sided figure and has a degree of 180

6. 3D figure with 2 parallel congruent circles, connected by a circular surface.

7. 3D figure with one circle faced connected by a curved surface.

9. 3D solid that has 6 faces
