

# Geometry CrossWord

## Across

4. A line that goes up and down  
 10. Angles that add up to 180  
 11. A parallelogram with four congruent sides  
 12. A quadrilateral with exactly one pair of parallel sides, called bases  
 13. Angles that add up to 90  
 14. A straight line that has a beginning but not an ending  
 15. A line segment formed by the intersection of two faces of polyhedron.

16. Two lines that do not intersect and are not coplanar  
 17. Two angles that are next to each other  
 18. A Quadrilateral with all angles are congruent  
 20. Two planes that do not intersect

## Down

1. Rules that are accepted without proof  
 2. A prism whose lateral edges are perpendicular to both bases

3. A polygon with all of its interior angles are congruent  
 5. A chord that passes through the center of the circle  
 6. A triangle that with at least two congruent sides  
 7. A line that goes side to side  
 8. When two lines cross over one another  
 9. A ratio from 0 to 1 that represents the likelihood an event will occur  
 19. A Quadrilateral with all characteristics
