

Name: _____

Date: _____

Geometry Terms

Across

3. The exact middle point in collinear points

9. Points lying in the same straight line

10. A straight or curved continuous extent of a length

11. Any set of straight lines passing through one point

12. The space between two intersecting lines or surfaces at or close to the point where they meet

13. A position, has 0 dimensions

Down

1. A point that is the end of a line segment

2. At an angle of 90 degrees to a given line, plane, or surface

4. Flat surface that goes in all directions, 2 dimensional

5. What we are learning right now

6. Each angular point of a polygon or other figures

7. Side by side and having the same distance continuously between them, never touch each other

8. A line that connects two points, 1 dimension
