

Geometry Vocab Ch. 1

Across

2. points that lie in a line
 10. statements that are accepted as true without proof
 11. having the same shape and size
 12. set of all points
 13. angle that measures 90
 14. a line with an endpoint that extends infinitely in one direction

16. distance between two endpoints

Down

1. points at the ends of segments or end of ray
 3. two points on a line & all points in between
 4. divides an angle into two congruent angles
 5. angles that share a vertex and a side

6. two (or more) items that are the same distance from a point are said to be this

7. the point that divides a segment into two congruent segments
 8. points that lie in the same plane
 9. important statements that have been proven
 15. figure formed by two rays that have the same endpoint
