

# Geometry Vocabulary

**Across**

- 3. The lateral faces that are not perpendicular to the faces
- 6. A face of a polygon other than a base
- 11. Where 2 lines meet in an angle
- 14. 6 faced polyhedron
- 16. 7 faced polyhedron
- 17. 4 faced polyhedron
- 19. 12 faced polyhedron

20. A solid formed by polygon surfaces that enclose a single region of space

**Down**

- 1. 20 faced polyhedron
- 2. 3-D circle
- 4. The point from which all points on the sphere are the same
- 5. 5 faced polyhedron
- 7. Half of a sphere
- 8. 10 faced polyhedron

- 9. The intersection of 2 lateral faced of a polyhedron
- 10. 8 faced polyhedron
- 12. The intersection of 2 faces in a polyhedron
- 13. A polyhedron with 2 parallel congruent bases
- 15. A polyhedron with 2 congruent parallel bases
- 18. One of the polygons and it's interior forming angles
