

# Geometry

## Across

5. 2 or more lines that lie on the same plane
6. A property that is used to prove congruence when dealing with geometric figures
7. Line segments with equal lengths
8. 2 shapes that look alike if you flip, slide, or turn it
9. A value that indicates the relation of a proposition to truth

10. Angles opposite each other when 2 lines cross

11. Have the same angles

## Down

1. 2 angles that add up to  $90^\circ$
2. If two geometric objects are congruent to a third geometric object, then they are congruent to each other
3. 2 angles that add up to  $180^\circ$
4. Flat surface that extends forever
