# Geometry - Chapter one
**Across**

**3.** The M of AB

**4.** Are segments that have the same length

**6.** A flat surface that has no thickness

**8.** Divides the segment in to two congruent segments

**10.** A straight path that has no thickness

**14.** Two angles whose measures have a sum of 90

**15.** Angle is a pair of adjacent angles whose noncommon sides are opposite ray

**16.** Part of a line consisting of two points

**17.** Two nonadjacent angles formed by two intersecting lines

**18.** Two angles whose measures have a sum of 180

**Down**

**1.** Names a location and has no size

**2.** Measure greater then 0 and less then 90

**5.** Are two angles in the same plane with a common vertex

**7.** An end point of two rays known as angles

**9.** The distance between A and B

**11.** Is usually given in degrees

**12.** Points that lie on the same line

**13.** Part of a line that starts at the end point
