

Geometry and Stuff

Across

4. The _____ of a circle is equal to "pi" times the radius squared

8. In a right triangle, referred to as "adjacent over hypotenuse"

9. A line that intersects a circle in exactly two points

10. In a right triangle, referred to as "opposite over hypotenuse"

11. In a right triangle, referred to as "opposite over adjacent"

12. The theorem that states a squared plus b squared equals c squared in any right triangle

Down

1. 3, 4, 5 is an example of a _____

2. A triangle with no congruent sides is called _____

3. This type of triangle has 3 congruent sides

5. The _____ of a circle is equal to the diameter times "pi"

6. A line on the same plane as a circle that intersects the circle in exactly one point, called the point of _____

7. A triangle with two congruent sides
