Name: _____ Date: _____

Geometry

Across

3. a quadrilateral having both points of opposite sides parallel to each other

5. a polygon with four sides

6. the intersection of two sides of a plane figure

9. a position in space

10. a rectangle having all four sides of equal length

13. the line segments between 2 points given on a curve

14. a continuous extent of length

16. two line segments which cross to form 90 degree angles

17. an equilateral parallelogram having oblique angles

18. a polygon with 5 sides and 5 angles

19. a triangle with one internal angle equal to 90

20. one part of a line

Down

1. line segments that cross each other

2. a parallelogram having four right angles

4. a triangle with all sides equal and all angles equal

7. a 90 degree angle

8. a triangle having three unequal sides and angles

11. a straight line extending from the center of a circle

12. an angle less than 90 degrees but greater than 0 degrees

15. a polygon having 8 sides and angles
