Geometry figures definitions

Across

- 1. A part of a line that connects two points
- 4. Is any of the line segments from its center to its perimeter
- 7. Either of two angles whose sum is 90°
- 8. The middle point in a circle
- 11. a flat surface with no thickness

- 12. The space within two lines or three or more planes diverging from a common point, or within two planes diverging from a common line

Down

- 2. Either of two angles whose sum is 180°
- 3. straight line segment whose endpoints both lie on the circle

- 5. A straight line passing from side to side through the center of a body or figure, especially a circle or sphere
- 6. Each angular point of a polygon, polyhedron, or other figure
- 9. a line with a start point but no end point
- 10. a labeled dot
