

Name: _____

Date: _____

Geometry line Terms

Across

- 5. segments that are parts of lines that are parallel
- 6. Lines that intersect at right angles
- 9. a straight path between 2 points called its endpoints
- 10. two rays or line segments with a common endpoint, called the vertex
- 11. a location in space

Down

- 1. segments that intersect at the right angles
- 2. segments that across or meet
- 3. lines that cross or meet
- 4. lines that never cross or meet and are everywhere the same distance apart
- 7. a straight path that goes on forever in one direction to form an endpoint
- 8. a straight path that does on forever in both directions
