

Geometry vocab

Across

- 2. a parallelogram with 4 congruent sides
- 7. an angle with the degree less than 90
- 10. a point outside an angle
- 12. a parallelogram with 4 right angles
- 13. a ray that divides an angle into 2 equal angles
- 14. an angle with the degree of 90
- 15. a straight set of points

- 17. line that intersects 2 or more co planar lines
 - 18. 2 angles that have a sum of 90
 - 19. a point inside an angle
- Down**
- 1. all sides are congruent on this triangle
 - 3. 2 angles that sum up to 180
 - 4. a flat surface made up of points

- 5. lines that are in different planes and never meet
- 6. two lines that cross over each other
- 8. no sides are congruent on this triangle
- 9. points that lie on the same plane
- 11. an angle with the degree greater than 90
- 16. two rays with a common endpoint
