

Name: _____ Date: _____

Getting to know Giapreza (Angiotensin II) better

1. What is the starting dose of Giapreza A. increases
2. How often can Giapreza be titrated up or down? B. 2.5mg/ml; single dose vial
3. Giapreza can be titrated in increments of what? C. April
4. What is the half life of Giapreza? D. 80ng/kg/min
5. Can you walk away from patient once Giapreza started? E. 5 minutes
6. Increases or decreases preload and afterload? F. 5 minutes
7. Increases or decreases Cardiac Output (CO) G. decreases
8. Solution is good for how long once hung? H. RAAS
9. Dosage of Giapreza before dilution? I. 10ng/kg/min at 30mins
10. how many nanograms in a microgram J. ACE inhibitors
11. What solution is Giapreza only compatible with? K. Absolutely No
12. What is final concentration of Giapreza when received from pharmacy? L. 1000ng
13. What type of medication can increase patient response to Giapreza? M. Cardiac Output (CO)
14. What medications can decrease effects of Giapreza? N. Angiotensin II blockers
15. What must be monitored PRIOR to using Giapreza? O. 0.02mcg/kg/min
16. You should absolutely avoid using Giapreza in patients with this issue. P. less than 1 minute
17. Giapreza targets which system to regulate blood pressure? Q. Normal Saline
18. Median time to response is approximately how many minutes? R. Low EF (ejection fraction)
19. Maximum dose during first three hours should not exceed S. 40ng/kg/min
20. Maintenance dose should not exceed T. less than or equal to 24hrs
21. Median dose of Giapreza is? U. 5,000ng/ml
22. Who is the best teacher EVER? V. 15ng/kg/min
