# Glacial Review

## Across

2. The shape of sediments that glaciers deposit.

8. When tills accumulate.

9. How glaciers deposit their sediments.

10. The shape of a glacial valley.

## Down

1. Small hills that point to the direction that a glacier has moved.

3. A large mass of compacted snow that moves.

4. Lakes in New York State that were left by glaciers.

5. Small lakes that glaciers can leave behind.

6. The movement of weathered rock.

7. The largest sediment a glacier can move.
