

Global Warming

Across

3. A sudden violent movement of the Earth's surface, sometimes causing great damage
7. When soil or land becomes too weak to stand and suddenly falls
9. Waste matter such as water or human urine or solid waste
10. A strong dangerous wind which forms itself into an upside down spinning cone and is able to destroy buildings as it moves across the ground
11. Waste material or unwanted things that you throw away

Down

1. A violent wind with rain which has a circular movement
2. The cutting down of trees in a large area
4. A severe snow storm with strong winds
5. Rain which contains large amounts of harmful chemicals as a result of burning substances such as coal and oil
6. A large amount of water covering an area that is usually dry
8. A long period where there is little or no rain
