

# Global Warming Activity

**Across**

- 2. The layer closest to the sun in Earth's atmosphere that protects the Earth from ultraviolet rays.
- 5. The gradual increase in Earth's atmospheric temperature.
- 6. The fastest-warming state in America.
- 7. The way heat is trapped in Earth's atmosphere by the increase of harmful gases.
- 9. Melting glaciers, changing ecosystems, stronger storms, heat waves and droughts, changing wind patterns.

- 10. A greenhouse gas that is often released by cows.

**Down**

- 1. The introduction of contaminants into a natural environment followed by negative change.
- 3. The clearing or thinning of forests by humans to make the land available for economic usage.
- 4. Generated power that is collected from renewable sources.
- 8. A type of intense air pollution.
