

# Grade 7 Geometry Terminology

## Across

1. Has two end points.  
 3. An angle greater than 90 degrees but smaller than 180 degrees.  
 6. A tool used to measure angles.  
 9. Two lines with a constant perpendicular distance.  
 12. Equal to 180 degrees.

13. Two lines which meet at an angle of 90 degrees.

14. Angles that share an arm and have a common vertex,

15. An angle equal to 90 degrees

16. An angle greater than 180 degrees but smaller than 360 degrees.

## Down

2. The sum of angles equal to 90 degrees.

4. The sum of angles equal to 180 degrees.

5. Can go on infinitely in both directions without any curves.

7. Construction tool used to mark off distance.

8. Equal to 360 degrees.

10. An angle smaller than 90 degrees, but greater than 0 degrees

11. Has one end point.
