

# Gram Morphology

## Across

2. G+purple, G-pink  
 6. Gram negative cocci (tiny pink pepper)  
 16. Rod-shaped  
 17. Gram positive yeast cells with CAPSULES  
 18. Small Gram positive bacilli (pleomorphic, L,V,W & club-shaped, Chinese letters)  
 19. Round or spherical  
 20. Large Gram positive bacilli (square ended/box car)

21. Gram negative bacilli (hotdog shape/ordinary/unremarkable)  
 22. Gram negative spirochaetes (spirals)

## Down

1. Gram negative coccobacilli (short, fat)  
 3. Gram positive diplococci (lancet/football/elongated)  
 4. Gram positive yeast cells/budding (oval, larger than cocci)  
 5. Gram negative diplococci (coffee bean, pairs of cocci with flattened sides)

7. Gram negative bacilli fusiforms (pointed/tapered ends)  
 8. Small Gram positive bacilli - palisading  
 9. Gram positive cocci in clusters  
 10. ZN (Ziehl-Neelson) - background is blue, AF bacteria is pink  
 11. Bacterial cell is one color, the spores are another color  
 12. Pointed ends  
 13. Lined up side by side  
 14. Coils, helical, spirals  
 15. Gram positive cocci in chains
