

Name: _____

Date: _____

HUMAN ORGAN SYSTEM: DIGESTIVE SYSTEM

Across

3. thick liquid of partially digested food produced by the stomach
4. component of a fat molecule, along with glycerol
8. organic molecules containing hydrogen, carbon, and oxygen
9. organic molecule consisting of a long chain of amino acids folded into a particular shape
10. process by which wastes are removed from the body
11. tiny, finger-like projection in the wall of the small intestine

Down

1. digestion physical breakdown of foods
2. organic molecule consisting of three fatty acids attached to a glycerol "backbone."
5. molecule, usually a protein, which catalyzes a chemical reaction
6. plant material in food that is difficult to digest
7. substance that is used by the body for energy, growth, or other processes essential to life
