

Heavy Lifting - Workplace Hazards

Across

6. A source or situation with the potential for harm
7. Heavy lifting is more of an issue with '----' over cats
8. The most commonly used method of control in the workplace
9. Working in a '----' when lifting heavy animals or objects is one way that employees can minimise the risk of injury during this form of manual handling
10. '-----' isn't possible in the workplace, thus other means of harm minimisation strategies must be used

Down

1. A means of hazard recognition in the work place
2. A form of manual handling resulting in a range of injuries, to the muscles in the back, in particular
3. A result of heavy lifting in the work place, causing potential pain to the muscles
4. It is highly important to '-----' an injury that occurs in the workplace within the 24-48 hours that it has occurred in
5. The number one priority if an injury at the workplace occurs, is
