

# Henry Classification

**Across**

- 3. The sub-secondary is \_\_\_\_\_ from fingers 2-4 and 7-9.
- 6. If there are no Small Letters present in 3-5 or 8-10, there will be a \_\_\_\_\_.
- 7. A Small Letter in either or both thumbs, \_\_\_\_\_ the Major.
- 11. If there are no small letters present in fingers 1 or 6, there will be a \_\_\_\_\_.
- 12. The Secondary is obtained from the pattern types present in the \_\_\_\_\_ fingers.
- 15. \_\_\_\_\_ (-) are used in the formula to indicate an Ulnar Loop or Whorl intervening between the index finger and the first Small Letter or between two Small Letters.

- 16. The \_\_\_\_\_ is computed using fingerprint blocks 5 or 10.
  - 17. \_\_\_\_\_ are used to represent the Secondary.
  - 19. The \_\_\_\_\_ is placed on the classification line to the immediate right of the Primary.
  - 20. A \_\_\_\_\_ is assigned to each of the ten finger blocks, ranging from 16-1.
  - 21. \_\_\_\_\_ consist of capital "A", small "a", capital "T", small "t", and small "r".
- Down**
- 1. The Major is computed using the \_\_\_\_\_.
  - 2. 1024 = the number of Primary \_\_\_\_\_.

- 4. Whorl \_\_\_\_\_ are also part of the Sub-Secondary.
- 5. ALL small letters MUST be indicated in the \_\_\_\_\_.
- 8. The \_\_\_\_\_ = the total of fingers 1, 3, 5, 7, 9 plus one.
- 9. \_\_\_\_\_ Small Letters are indicated by: 2a, 2t, 2r, etc as they appear in fingers 3-5 or 8-10.
- 10. Small letters are brought up on the classification line in their relative position to the \_\_\_\_\_.
- 13. The \_\_\_\_\_ = the total of fingers 2, 4, 6, 8, 10 plus one.
- 14. The \_\_\_\_\_ is computed using the ridge count of the first loop beginning with the right thumb, excluding both little fingers.
- 18. The \_\_\_\_\_ is placed in the center of the classification line.
