

Heredity

Across

- 2. The passing of traits from parent to offspring
- 7. the genetic makeup of an organism
- 8. describes a trait that is covered over by another form of that and seems to disappear
- 9. an offspring that was given different genetic information for a trait from each parent
- 10. describes an organism with two alleles that are the same for that trait
- 11. an alternate form from that a gene may have for a single trait

Down

- 1. outward physical appearance and behavior of an organism as a result of its genotype
- 3. describes an organism with two different alleles for a trait
- 4. a tool to predict the probability of certain traits in offspring that shows the different ways alleles can combine
- 5. the study of how traits are inherited through the actions of alleles
- 6. describes a trait that covers over another form of that trait
