Date: _____

How Well Do You Know The Circulatory System?!

- | | |
|--|----------------------|
| 1. Carry oxygen to the body's tissues | A. Arterioles |
| 2. Carry blood from the heart to the body's tissues | B. Red blood cells |
| 3. Lies at the exit of each heart chamber | C. Right atrium |
| 4. Where blood from the body arrives | D. Valve |
| 5. Pumps blood into the lungs to pick up more oxygen | E. Blood |
| 6. Heart's upper chambers | F. Left ventricle |
| 7. Help defend the body against infection | G. Left atrium |
| 8. Carry blood back from the tissues to the heart | H. Veins |
| 9. Composed of a straw-colored fluid, plasma, and huge numbers of blood cells that float in the plasma | I. Aorta |
| 10. Heart's lower chambers | J. Atria |
| 11. Body's largest artery | K. Arteries |
| 12. Receives oxygen-rich blood back from the lungs | L. White blood cells |
| 13. Pumps blood by way of the aorta to the body | M. Capillaries |
| 14. Smallest type of vessel | N. Right ventricle |
| 15. Small arteries | O. Venules |
| 16. Small veins | P. Ventricles |
