# Hydrology

## Across

- 5. A body of permeable rock that can contain or transmit groundwater.
- 6. The state or quality of a material or membrane that causes it to allow liquids and gases to pass through it.
- 7. Excessive richness of nutrients in a lake or other bodies of water; frequently due to runoff from the land.
- 10. The method in which water is supplied to plants at regular intervals for agriculture.

## Down

- 1. A process that removes minerals from saline water.
- 2. The saltiness or dissolved salt content of a body of water.
- 3. Water held underground in the soil or in pores and crevices in rock.
- 4. A barrier made to hold back water.
- 8. A large artificial lake used as a source of water supply.
- 9. Safe to drink; drinkable.
