

Image Types Creative IMedia Key Words

Across

- 2. A raster graphics format that is ideal for high resolution printing; it is higher quality than a JPG, but because of this, takes up a lot of disk space
- 5. A type of graphics in which the image is created using lines and curves defined by mathematical formulas.
- 6. The file extension associated with saving a Photoshop document. It is a raster image.
- 8. A small square of color used to create a graphic.
- 10. Allowing light to pass through so that objects can be clearly seen on the other side; the opposite of opaque.

Down

- 1. A small square of color used to create a graphic.
- 3. An image which is made up of pixels, also known as a bitmap image.
- 4. Remove a portion of a picture that you don't want.
- 7. Some data is lost during compression. JPG and GIF are lossy
- 9. A section within a graphic image that can be manipulated independently. A piece of artwork can have multiple layers. Layers can also be flattened (merged).
