

Importing Graphics

Across

1. The number of pixels in an image.
2. The permission granted to use a work of art without transferring ownership.
3. A graphic enhancement that places a shadow on the edge of an image or text.
11. Usually a line drawing that is created as a vector graphic.
13. The type of program that created an image.
14. A compression that does not change any pixel data.
16. A type of image created using pixels.

17. An image that has been enlarged or reduced.

18. An image created by using a series of lines and curves rather than pixels.

19. The movement of an image along a center axis.

20. The speed at which a computer can transmit information along a network.

Down

4. A vector graphic that converts to a bitmap.

5. A term that describes a work of art that can be used without having to pay a fee or royalty each time you use it.

6. Frames that are placed within text and must stay with that text.

7. A broad term that describes anything on a page that is not text.

8. Formats that can only be read by a single program.

9. The space between an image and text.

10. A description of a figure that indicates it can be placed anywhere on a page.

12. The process of reducing the size of the image.

15. Another term for standoff.
