

Industrial Revolution

Across

- 2. The manufacture of a product in large numbers and at low cost, using manual labor and specialized machines.
- 7. A Scottish engineer and inventor whose improvements in the steam engine led to its wide use in industry
- 11. A device for communicating over a long distance by using electricity to send coded messages through wires
- 12. Organizations who bargained for better wages, hours, and conditions

- 13. The inventor of the cotton gin and later the process of mass production

Down

- 1. A period beginning in the 18th century in which society moved to a focus on machines, factories, and industry
- 3. A boat driven by steam power
- 4. An economic system in which individuals rather than the government control the factors of production

- 5. A business or organization authorized by law to carry on an activity with the rights and duties of a single person

- 6. A multiple-spindle machine for spinning wool or cotton
- 8. A machine that separates the seeds, hulls, and other materials from cotton
- 9. A machine that uses the energy of evaporating water to generate power
- 10. Hard physical work
