

# Industrial Revolution

## Across

2. when workers come together to protect their labor rights
7. a time period around the 1800s when we were introduced to many new inventions, types of transportation, and we moved from rural areas into the cities and did a lot more of work in factories
10. when people moved from rural areas to the city for better job opportunities
12. when workers protest against their boss, and they refuse to work if they do not like something that he has set for them.
13. the \_\_\_\_ working conditions were terrible. They had to work long hours (14-18), they had no safety regulations so it was dangerous, low pay, no sick leave, children worked, and it was extremely dirty
