

Infectious Diseases and Pharmacology

Across

4. Inhibit enzymes responsible for viral precursor cleavage
 6. Pathogen that doesn't cause illness immediately
 7. Infection type of patient presenting with chills, night sweats, and joint pain
 12. Fluoroquinolones increase the risk of _____ in an elderly patient
 14. "Runny nose"
 17. Infection from needle sharing
 18. Infection type of a woman with toxic shock syndrome

20. Cause of lab work showing increased WBC count
 22. Human Herpesvirus-3
 23. Shingles presentation
 24. Blood infection
 25. Infection that secretes enzymes to destroy cells

Down

1. Long-term hepatitis is a major cause of this
 2. A 52 year old man with venous insufficiency may develop this
 3. "Itch"
 5. A nurse caring for an elderly woman with a UTI may contract

8. Potential infection type of patient presenting with diarrhea and abdominal pain
 9. Causes intermittent inflammatory arthritis
 10. Number 1 HAI
 11. Some antibiotics can cause this
 13. Inhibit building blocks of DNA or RNA
 15. Number of fatalities over number of cases
 16. Lethargy and ulcers are indicative of this
 19. Needlestick infection
 21. Originating in a hospital
