

Injury Care and the Sports Medicine Team

Across

6. An individual commits an act that is not his or hers to perform, or commits an act that is his or her duty to perform but carries out the wrong procedure, leading to injury or harm. i.e. providing CPR without having been CPR trained or certified

8. Acknowledgement of participant, understanding the risks associated with their participation in a specific activity.

9. The final authority to determine the mental and physical fitness of athletes in organized programs

10. Occurs when an individual commits and act that is their responsibility to perform but uses the wrong procedure or does the right procedure but in an improper manner. i.e. you dry needle someone using a sewing needle, rather than the appropriate gauge needle

12. Occurs when an individual commits a negligent act while providing care

13. Civil wrong done to an individual whereby the injured party seeks a remedy for damages suffered

14. Occurs when an individual commits an act that is not his or hers responsibility to perform. i.e. If you suspect someone has appendicitis and you remove the appendix

15. Failure to carry out a legal duty

16. Any unpermitted or intentional contact with another individual without their consent.

Down

1. An emergency first aider acts in good faith to help a victim, acts without expected compensation, acts during an emergency

2. Occurs when an individual has total disregard for the safety of others. i.e., many of the previous examples provided.

3. An individual fails to perform a legal duty. i.e. failure to warn rollercoaster riders of risks associated with riding the rollercoaster

4. Implies that an injured party has been reasonably informed of needed treatment, possible alternative treatment, and advantages or disadvantages of each course of action. Authorization to treat in absence of parent.

5. Individual providing a unique and valuable resource in the overall rehabilitation of an individual

7. Occurs when an individual fails to perform their legal duty of care

11. Measured by what another minimally competent individual educated and practicing in that profession would have done in the same or similar situation.
