

Inner Planets

Across

- 1.** Percentage of Mars's oxygen
3. 20% of Venus's atmosphere
6. This planet is 58,000,000 km away from the sun
10. The solid rock layer of the Earth

- 11.** The solid inner layer (mostly made of iron and nickel)
13. What found evidence of water on mars?
14. The molten rock layer of the Earth
15. Mercury has virtually no

Down

- 2.** Only planet other than Earth with frozen ice caps

- 4.** This is weak on Mercury
5. Venus rotates
7. The liquid center (mostly make of iron and nickel)
8. Venus's temperature
9. Mercury is most likely made up of dense
12. The Earth's twin
