

Name: _____

Date: _____

Inorganic compounds

Across

2. positive or negative ions used in metabolic processes

5. a transition metal with an atomic number of 26

8. a naturally inorganic material that majority of living matter needs

10. manmade or not natural

11. an atom without the a full outer shell of electrons

12. a compound with the chemical formula PO_4^{3-}

13. a nutrient only needed in small amounts

Down

1. a nutrient required in large amounts

3. something that is derived from an living organism is

4. a transition metal with the state symbol of Cu

6. a soft grey, alkaline earth metal commonly found in dairy

7. this brittle and less dense metal has an atomic number of 30

9. the 8th most abundant element found on earth
