

Name: _____

Integer

Across

- 4. a result of a positive counter paired with a negative counter
- 7. what you owe; ex) money borrowed from parent or bank
- 9. a plane in which a horizontal number line and a vertical number line intersect
- 11. four sections of the coordinate plane
- 15. a combination of numbers and operations signs with an equal sign
- 16. a number with no fractional part counting number(1,2,3) also negative counting numbers(-3,-2,-1,0,1,2,3)
- 17. corresponds to a number on the x axis

18. point at which the number lines intersect (0,0)

20. arranging integers in order by their value

21. every positive rational number and its negative pair

Down

- 1. On the left side of zero on a number line
- 2. adding, subtracting, multiplying and or dividing of integers
- 3. corresponds to a number on the y axis
- 5. Steps to follow for subtracting integers
- 6. pairs of operations that undo each other

8. distance a number is from zero on the number line

10. two integers that are opposites; their sum is always zero

12. Keep the first number; change + to -, and change the sign of the second number then use adding

13. a pair of numbers used to locate a point in the coordinate plane (5, -2)

14. to examine 2 or more items or concepts to see how they are alike COMPARE to examine 2 or more items or concepts to see how they are different

19. On the right side of zero on a number line
