

# Interactionism and Labelling Theory of crime and deviance

**Across**

- 3. unreported or unrecorded crime which has been committed but will not show in official crime statistics
- 5. A label which overrides all others
- 9. Lemert's term for deviance caused by the social reaction to the initial deviance
- 11. coming to live up to a label
- 12. A process describing how social reactions can actually create more deviance

- 13. Created when public concern is out of proportion to the actual level of threat
- 14. How interactionists view official statistics

**Down**

- 1. Lemert said this may be created through labelling, marginalisation and seeking a deviant subculture
- 2. Said police decisions to arrest are often based on physical cues from which they make inferences about a person's character

- 4. Lemert's term for an initial act of deviance
- 6. Whether a label is applied or not comes down to a process of
- 7. Cicourel's term for taken for granted assumptions about typical offenders
- 8. A person or group which is over labelled and over exposed to scrutiny
- 10. Your own perception of yourself
