

KEY PARTS OF A GRAPH

Across

- 4. A value at which the function is less than or equal to all other values in the function.
- 8. A value at which the function is greater than or equal to all other values in the function.
- 9. The point at which a function crosses the y-axis
- 10. The set of values of the dependent variable for which a function or relation is defined. (y-values)

Down

- 1. When a parabola 'smiles'
- 2. A line through a shape so that each side is a mirror image.
- 3. The point at which a function crosses the x-axis.
- 5. When a parabola 'frowns'
- 6. The set of values of the independent variable for which a function or relation is defined. (x-values)
- 7. The point at which the parabola crosses its axis of symmetry.
