

Keeley Johnson

Across

2. The anticipated increase in earth's temperature caused by carbon dioxide trapping some of the radiation emitted by the surface
3. A factory built by a U.S. company in Mexico near the U.S. border, to take advantage of the much lower labor costs in Mexico
9. Likely to decay or go bad quickly
12. One of the four factors of production
13. A gas that absorbs ultraviolet solar radiation, found in the stratosphere, a zone 15 to 50 kilometers above the earth's surface
14. A fabric made by weaving, used in making clothing
15. a place to dispose of refuse and other waste material by burying it and covering it over with soil, especially as a method of filling in or extending usable land

17. A decision by a corporation to turn over much of the responsibility for production to independent suppliers

18. The amount of oxygen required by aquatic bacteria to decompose a given load of organic waste

19. A U.S. law that prevents a union and a company from negotiating a contract that requires workers to join the union as a condition of employment

20. Conversion of sulfur oxides and nitrogen oxides to acids that return to earth's surface

Down

1. Sulfur oxides and nitrogen oxides, emitted by burning fossil fuels, that enter the atmosphere and return to the earth's surface

4. Location factors related to the cost of the factors of production inside a plant, such as land, labor, and capital

5. A gas used as a solvent, a propellant in aerosols, a refrigerant, and in plastic foams and fire extinguishers

6. A series of improvements in industrial technology that transformed the process of manufacturing goods

7. Location where transfer among transportation modes is possible

8. An atmospheric condition formed through a combination of weather conditions and pollution, especially from motor vehicle emissions

10. Concentration of trace substances, such as carbon monoxide, sulfur dioxide, nitrogen oxides, hydrocarbons, and solid particulates, at a greater level than occurs in average air

11. Location factors related to the transportation of materials into and from a factory

16. Needing a large workforce or a large amount of work in relation to output
