

LEARNING AND MEMORY

Across

- 2. The heart of the brain?
- 3. Block this to get untangled
- 7. Yes! Time can be about words and rules
- 11. Inner room?
- 14. Clear about idea on TV ...conscious of this for sure!
- 15. His disc is a remote area but is affected
- 16. For LTP? For LTP?!
- 17. Allows calcium when random experiences loss of nothing

- 18. Emitting this to indicate neural activity?
- 19. Stress is associated with an increase in the rate of in a part of the brain implicated in memory storage and retrieval

Down

- 1. Don't I recognise this mini grip?!
- 4. End-products of HPA axis during stress
- 5. Forgetting when new information is entered into memory

- 6. He gave us a gold standard paradigm used for studying spatial memory
- 8. A theory of generation that opposes the theory of evolution
- 9. It is a sickness of gravity to get worked up
- 10. A neuropeptide essential for social memory
- 12. Should you eat nuts to arrive at a landmark discovery in neuroscience?
- 13. Neuronal firing is one principle on which the model of learning and memory is based. What is the other?
