

Landforms

Across

2. A crescent shaped lake created when a loop in a river is cut off by the flow of water
 3. A wall-like structure made of rock that sticks out into the ocean
 6. The movement of weathered rock from place to place
 10. A physical feature on earth's surface
 13. Particles of soil or rock that has been eroded (worn away) and deposited

14. A deposit of sediment that builds up at a river's mouth

Down

1. The belief that earth's crust is divided into plates that move creating volcanic action and earthquakes
 4. A deposit of sediment in a flat area along the banks of a river
 5. A mound of sand piled up by wind
 7. The downhill movement of rock and soil because of gravity

8. The breakdown of rock at or near the earth's surface
 9. The dropping of sediment or particles by water, wind or ice
 11. A ridge of sediment and rock left behind when a glacier melts
 12. A crack in the earth's surface
