

Language Acquisition

Across

5. Expert in the field of linguistics, creator of ELL principles
7. Two independent ways in which we develop our linguistic skills.
9. Term used to emphasize the natural process and way that a child acquires a language.
10. Theory that adults have two independent systems for developing an ability in 2nd languages: subconscious language acquisition, and the conscious language learning.

Down

1. Provides teachers with a basis for understanding various requirements for reaching out to ELL students in varied cultures.

2. Learning brought about by a negative emotional state such as embarrassment and self consciousness.
3. Theory we acquire the rules or language in a predictable order.
4. Students improve and progress in a natural order in which they are constantly receiving input.
6. LEARN AT HOME, LEARNED BY A VERY YOUNG AGE, LARGELY AN UNCONSCIOUS PROCESS.
8. Learned at school through TV or @ the work place, usually a conscious effort
