

Name: _____

Date: _____

Lesson 1: Introduction to Weather and Climate

Across

2. someone who studies the life of the ocean
3. someone who studies the fossil evidence of the sea floor and undersea plate tectonics
8. someone who studies the motion in the ocean, such as currents, waves, and tides
9. long term atmospheric conditions of a specific region
10. a representation of the earth on a sphere

11. someone who studies the weather in large areas over long spans of time

Down

1. someone who studies the ocean
4. someone who monitors, investigates, and forecasts the weather
5. someone who studies the chemistry of the ocean (saltwater composition)
6. short term atmospheric conditions
7. a representation of the earth on a flat surface
