

Name: _____

Date: _____

Levels of Organization & Ecological Succession

Across

- 7. Levels of what.
- 10. The species that first appears after disturbance in an ecosystem.
- 11. Succession in which there is no soil.
- 12. The place where organisms live; part of an organism's niche.
- 13. The process of change in a species structure.

Down

- 1. A group of organisms that can breed and populate.
- 2. After ecological succession, this community remains unchanged unless there is a change in environment.
- 3. Succession in which the environment is only partially destroyed and soil remains.
- 4. What is the largest level of organization?

- 5. The role of an organism.
- 6. A simple, slow growing plant that is often the pioneer species during primary succession.
- 8. A group of interacting species.
- 9. What level of organization comes after ecosystem and before biosphere?
