

Life Science Review

Across

- 1. This type of relationship is like the shrimp and fish. The shrimp cleans the fish's home and the fish watches out for the shrimp.
- 4. I go in order from start to finish. I show energy transfer. I end with a top level consumer. I only have 1 producer.
- 7. I am a type of organism that eats dead animals.
- 11. What would these organisms be classified as: duck, turkey, chicken, grasshopper?
- 13. This is where 2 organisms of different species interact.
- 16. What do you call the organism the parasite attaches to?

17. This is the level at the top of an energy pyramid.

19. What relationship am I? I am a tick that takes blood from a moose and makes it weak.

20. A plant takes in carbon dioxide and gives off _____.

Down

2. This is the level of an energy pyramid right above producers.

3. What organism utilizes photosynthesis to make its own food?

5. I hunt animals to eat them. I am this type of organism...

6. A barnacle and a whale are an example of this relationship.

8. A plant's main source of energy is this...

9. I am hunted by other animals. I am this type of animal...

10. I am a herbivore. I live in Ohio. I eat grass and clover. I am a consumer. I am prey to coyotes.

12. I break down dead waste and organisms to add nutrients to the soil.

14. What type of organism is a mosquito considered?

15. I am complex. I show how energy is transferred. I can have many producers.

18. I am a synonym for rabbit, I just have larger ears.
